Zone 5	Light Blue	Mary Lane Hospital, Kanzaki, Upper West Street
Zone 6	Light Purple	West Street Anderson Road Gould Road
Zone 7	Light Pink	Palmer Road Malboeuf Road Old Belchertown Road Bacon Road

CODE RED ANNOUNCEMENT

Hello

This is a call from the Town of Ware Water Department with an important message.

Beginning _____ the Water Department will begin the water flushing in your section of town.

The water flushing is conducted Monday thru Friday from 7:30 AM to 3 PM.

During the flushing procedure you may experience discolored water, low water pressure or low flow water for a short period of time. The staff will do everything they can to avoid disturbances and disruptions.

Since the flushing is designed to remove deposits from the water main, highly colored will occur when a pipe is being flushed. It is advisable to not consume or use this discolored water. If possible, wait for work to be completed in your area, and then run the water from all your faucets until the water runs clear. This should only take a few minutes to clear from your water pipes and not waste a significant amount of water.

We suggest that you store some clean water for your use while the flushing takes place during the day until the system has a chance to stabilize.

We also recommend that you wait until the evening to do any laundry and test the water before you start. If it remains cloudy, you will need to wait longer.

Please inform all members of your household of this event and the recommendations.

For more information go to the town's website at www.townofware.com

The Ware DPW and Water Department thanks you for your patience during this very necessary process.

Thank you and good bye.
